Telemetry is used to study wildlife, and has been useful for monitoring threatened species at the individual level. Animals under study can be outfitted with instrumentation tags, which include sensors that measure temperature, diving depth and duration (for marine animals), speed and location (using GPS or Argos packages). Telemetry tags can give researchers information about animal behavior ...

Blair Williams and Wilson Bentley by Duncan C. Blanchard (April 24, 2007) On a warm summer's day in August, 1966, with popcorn clouds sailing east from over Lake Champlain, I drove from Burlington to Jericho to begin my quest to learn all that I could about Wilson Bentley, the Jericho farmer who in 1885 made the world's first photographs of snowflakes.
