Also known as a "tubular skylight" or "tubular daylighting device", this is the oldest and most widespread type of light tube used for daylighting. The concept was originally developed by the ancient Egyptians [citation needed]. The first commercial reflector systems were patented and marketed in the 1850s by Paul Emile Chappuis in London, utilising various forms of angled mirror designs.

Abstract In the quest to improve performance of buildings, without compromising occupant comfort, (both thermal and visual comfort), the utilization of passive measures in the buildings is a good alternative for energy efficient non-domestic

(PDF) The Integration of Occupant Comfort, Energy and

The total enthalpy of a system cannot be measured directly, the enthalpy change of a system is measured instead. Enthalpy change is defined by the following equation: $\Delta H = H_f - H_i$, where ΔH is the "enthalpy change", H_f is the final enthalpy of the system (in a chemical reaction, the enthalpy of the products), H_i is the initial enthalpy of the system (in a chemical reaction, the enthalpy of the ...

Enthalpy - Wikipedia

The Division of School Facilities (DSF) is primarily responsible for the maintenance, repair, and the safe, efficient operation of all facilities under the jurisdiction of the The City of New York's school system. Currently, there are over 1,300 buildings that make up the Department of Education infrastructure. We provide expertise in every aspect of building management and maintenance.
