Housekeeping Positions Study Guide 3 1. CLEANING GENERAL Asthma is the leading cause of disease-related absenteeism in the United States.

HR Housekeeping Study Guide 4-25-11

Thoroughly clean the scrub sink area, including the counter, faucet and handles, sink basin, under the sink, and all pipes where condensation can harbor germs. Clean the spout of the faucet by putting the cloth in the opening and wipe. Be sure to lift any floor mats when cleaning these areas and clean mats as well.

Health Care Environmental Services - Fight C-Diff

With a clean, GREEN, color-coded microfiber cloth (do not use this cloth to clean outside the bathroom areas), or properly saturated wipe, clean the sink area, including the counter, faucet, handles and sink basin. Pay special attention to corners, the soap dispenser and the rim of the sink drain.
