CS-102 Logical Organization of Computers . Aims There are two views of computer architecture. The traditional view, dating back to the IBM System/360 from the early 1960's, is that the architecture of a computer is the programmer-visible view of the machine, while its implementation is the province of the hardware designer.

The Internet of Mobile Things (IoMT) (Talavera et al., 2015) is a special case of the IoT concerned with the challenges of dealing with mobile IoT devices. Such mobile devices include smartphones, vehicles, wearable devices, and smart watches. It is worth noting that the same abbreviation is used to refer to the Internet of Moving Things (Hernandez et al., 2017) and to various totally different ...
