A wind turbine, or alternatively referred to as a wind energy converter, is a device that converts the wind's kinetic energy into electrical energy.. Wind turbines are manufactured in a wide range of vertical and horizontal axis. The smallest turbines are used for applications such as battery charging for auxiliary power for boats or caravans or to power traffic warning signs.

Wind turbine - Wikipedia

To encourage the long-term management of woodlands to produce forest crops and thereby increase the likelihood of a more stable forest economy, the State of New York in 1974 enacted the 480-a forest tax law to qualifying owners.
