What's Next? What's Next? Before the mission ended, Cassini's was an already powerful influence on future exploration. In revealing that Enceladus has essentially all the ingredients needed for life, the mission energized a pivot to the exploration of "ocean worlds" that has been sweeping planetary science over the past couple of decades.

As scientists are working to explain the insect apocalypse , this video highlights one common environmental toxin that is known to kill insects, that is 5G as well as 3G and 4G radiation. He points out that “the 30-year radiation from millions of cellular phone masts is the single factor present in every region of insect decline.”
