Developmental psychology is the scientific study of how and why human beings change over the course of their life. Originally concerned with infants and children, the field has expanded to include adolescence, adult development, aging, and the entire lifespan. Developmental psychologists aim to explain how thinking, feeling, and behaviors change throughout life.

Cultural-historical psychology is a branch of psychological theory and practice associated with Lev Vygotsky and Alexander Luria and their Circle, who initiated it in the mid-1920s-1930s. The phrase "cultural-historical psychology" never occurs in the writings of Vygotsky, and was subsequently ascribed to him by his critics and followers alike, yet it is under this title that this intellectual ...

What is the Meaning of Self-Regulation? Andrea Bell from GoodTherapy.org has a simple, straightforward definition of self-regulation: Self-regulation is "control [of oneself] by oneself" (2016). It can refer to self-control by a wide range of organisms and organizations, but for our purposes, we'll focus on the psychological concept of self-regulation.

So What Is Positive Education? Positive education is the combination of traditional education with the study of happiness and well being, using Seligman's PERMA model and Values in Action (VIA) classification. Seligman has been working on incorporating positive psychology into education to decrease depression in younger people and enhance well being and happiness.

Piaget (1936) was the first psychologist to make a systematic study of cognitive development. His contributions include a stage theory of child cognitive development, detailed observational studies of cognition in children, and a series of simple but ingenious tests to reveal different cognitive abilities.
