Relative humidity (RH) is the ratio of the partial pressure of water vapor to the equilibrium vapor pressure of water at a given temperature. Relative humidity depends on temperature and the pressure of the system of interest. The same amount of water vapor results in higher relative humidity in cool air than warm air.

### **Relative humidity - Wikipedia**

An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.. An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not a biological neuron model.

### **Artificial neural network - Wikipedia**

Si el sistema en el estado A se calienta isobáricamente (calentamiento sin cambio en la presión del sistema), entonces la humedad relativa del sistema disminuye porque la presión de vapor de agua en equilibrio aumenta con la temperatura en aumento.
