An abstract is a brief summary of a research article, thesis, review, conference proceeding, or any in-depth analysis of a particular subject and is often used to help the reader quickly ascertain the paper's purpose. When used, an abstract always appears at the beginning of a manuscript or typescript, acting as the point-of-entry for any given academic paper or patent application.

No, man! They're not! McLeod and Crowe's norms data wasn't new OR different from what's been published for the last several decades. Instead, this article is basically a summary of previous developmental norms studies. Think about it like the authors grouped previous data together, and combined it all so you could view an average across studies.
