### **Life Sciences | ScienceDirect.com**

When discussing scope, there are three basic concepts: scope, extent, and context. "Scope" and "context" in particular are frequently confused: scope is a property of an identifier, and is fixed, while context is a property of a program, which varies by position.

### **Scope (computer science) - Wikipedia**

The life sciences or biological sciences comprise the branches of science that involve the scientific study of life and organisms – such as microorganisms, plants, and animals including human beings.. Life science is one of the two major branches of natural science, the other being physical science, which is concerned with non-living matter.. By definition, biology is the natural science ...
