The Royal Navy (RN) is the United Kingdom's naval warfare force. Although warships were used by the English kings from the early medieval period, the first major maritime engagements were fought in the Hundred Years War against the Kingdom of France. The modern Royal Navy traces its origins to the early 16th century; the oldest of the UK's armed services, it is known as the Senior Service.

0-9: Naval method of indicating the time of day aboard ship, usually over the 1MC. One bell corresponds to 30 minutes past the hour. Bells will only be rung as a single strike, or a closely spaced double strike, with a maximum of eight bells (4 sets of 2). Bells repeat themselves every 4 hours. For example 2 sets of 2 bells, followed by a ...

Developed criteria for ship risk models applicability to autonomous ships. • None of the models could fulfil all criteria, but some can be used as starting point.

## Assessing ship risk model applicability to Marine

Note that in September 2018 Model 200 was discontinued but replaced by Model 210. The only difference is the software. Model 200 shipped with the DROPImage Standard software (contact angle and surface energy) while Model 210 ships with the new DROPImage Pro (contact angle, surface energy, surface tension, and interfacial tension).
