How to Link Tables Using SQL Named Parameters

Everyday most of us deal with multiple string functions in Sql. May it be for truncating a string, searching for a substring or locating the presence of special characters.

Using Regular Expressions in Oracle | Oracle FAQ

Warning. You should be very careful whenever you write raw SQL. Every time you use it, you should properly escape any parameters that the user can control by using params in order to protect against SQL injection attacks. Please read more about SQL injection protection.

Performing raw SQL queries | Django documentation | Django

The number of seconds until a lock timeout exception is thrown can be set separately for each connection using the SQL command SET LOCK_TIMEOUT <milliseconds>. The initial lock timeout (that is the timeout used for new connections) can be set using the SQL command SET DEFAULT_LOCK_TIMEOUT <milliseconds>. The default lock timeout is persistent.

Features - H2

Scripts can be used to take a snapshot of a VM with the Oracle application. These scripts enable VMware to suspend I/O updates to the Oracle database until the VMware Linux guest snapshot is completed.
