Welcome to Statsmodels's Documentation¶. statsmodels is a Python module that provides classes and functions for the estimation of many different statistical models, as well as for conducting statistical tests, and statistical data exploration. An extensive list of result statistics are available for each estimator. The results are tested against existing statistical packages to ensure that ...

StatsModels: Statistics in Python — statsmodels 0.9.0

Statistics is a branch of mathematics dealing with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

COST BENEFIT ANALYSIS MODELS & USE OF ARTIFICIAL INTELLIGENCE FOR PUBLIC POLICIES Although cost benefit analysis and other frameworks for rational decision-making are being applied in more and more situations, these tools play too little a role in too many decisions--partly due to the time and funds required to implement good studies, and partly due to rigid adherence to fixed ideas, political ...

COST BENEFIT ANALYSIS MODELS

Hi Matt, A latent class model is just a type of finite mixture model. Finite mixture models are any model where the data is modelled by a weighted mixture of distributions rather than a single distribution.
