We introduce a generalization of the popular local-to-unity model of time series persistence by allowing for  $p$  autoregressive roots and  $p-1$  moving average roots close to unity. This generalized local-to-unity model, GLTU( $p$ ), induces convergence of the suitably scaled time series to a continuous time ...

History of ECM. Yule (1936) and Granger and Newbold (1974) were the first to draw attention to the problem of spurious correlation and find solutions on how to address it in time series analysis. Given two completely unrelated but integrated (non-stationary) time series, the regression analysis of one on the other will tend to produce an apparently statistically significant relationship and ...

The economics of happiness or happiness economics is the quantitative and theoretical study of happiness, positive and negative affect, well-being, quality of life, life satisfaction and related concepts, typically combining economics with other fields such as psychology, health and sociology. It typically treats such happiness-related measures, rather than wealth, income or profit, as ...

2.1. Capital structure measure. Welch (2011) points out that the question of how to measure a firm's capital structure is more important than often recognized. Unfortunately, prior empirical capital structure research has tended to ignore two critical issues. First, studies (e.g., Mehran, 1992, etc.) that use book value measures fail to recognize that book equity is a plug number in accounting ...
